Leasing

Consumer Finance

Apple provides financing choices for qualifying customers. You can bundle your Mac, iPad, AppleCare, software and even accessories into a monthly payment..

- [Apply Online](#) or call 133-622.
- Or visit your nearest [Apple Retail Store](#)

Setting up your child's iPad for school

- Create an Apple ID
 - Our recommendation is that your child does not know the password to this account.
- Restrictions – Setting restrictions is a sensible plan, however over-restriction can be detrimental for educational purposes.
- Family Sharing
 - Allows you to purchase apps/music/books once and share it across multiple devices and accounts.
 - Please be careful what you share.

Loading Apps

- If your child is using a hand me down device...
- Make sure you have the latest version of iOS, currently iOS 13.2.3
- Older devices are no longer supported, eg iPad 2 (9.3.5), iPad Air (10.3.3), iPad Mini (10.3.3). This will cause compatibility and accessibility issues, particularly with the introduction of iOS 13.
- AirDrop is also a highly valuable feature of iPads and is not available on older models such as the iPad2.

Accessing the internet at School

- Every device is able to join our BYOD network after an initial connection is made.
- Once children arrive at school their device will automatically find and connect to the network.
- If a device connects to another school network, the device will be disconnected from that network by IT support and reconnected accordingly.
- Google apps require students to sign in with their user name and password. This is generated by Catholic Education upon enrolment. If your child does not know their school username and password, they will be provided it at the beginning of the term.

Setting up Email

- Student emails are generated at the CE level. The school cannot control email addresses and login codes that are generated for students.
- The positive: Access to a range of Microsoft and Google products with no additional setup.

Security

- iPads are delivered directly to the Library upon arrival at school. The device is transferred from the students bag and deposited immediately into the iPad trolley. iPads are supervised at this time.
- iPads are locked in cupboards or offices at recess and lunch times.
- iPads may not be stored at school overnight.

Parent Checklist

- Please discuss the Student Agreement Documents with your child.
- Please ensure your child understands they are **NOT** to share their iPad with anyone. The teacher will not ask them to do this.
- Photos, video & audio are not to be taken unless specifically directed by the teacher.
- Relief teachers may leave the iPad unused for the day

Peripherals

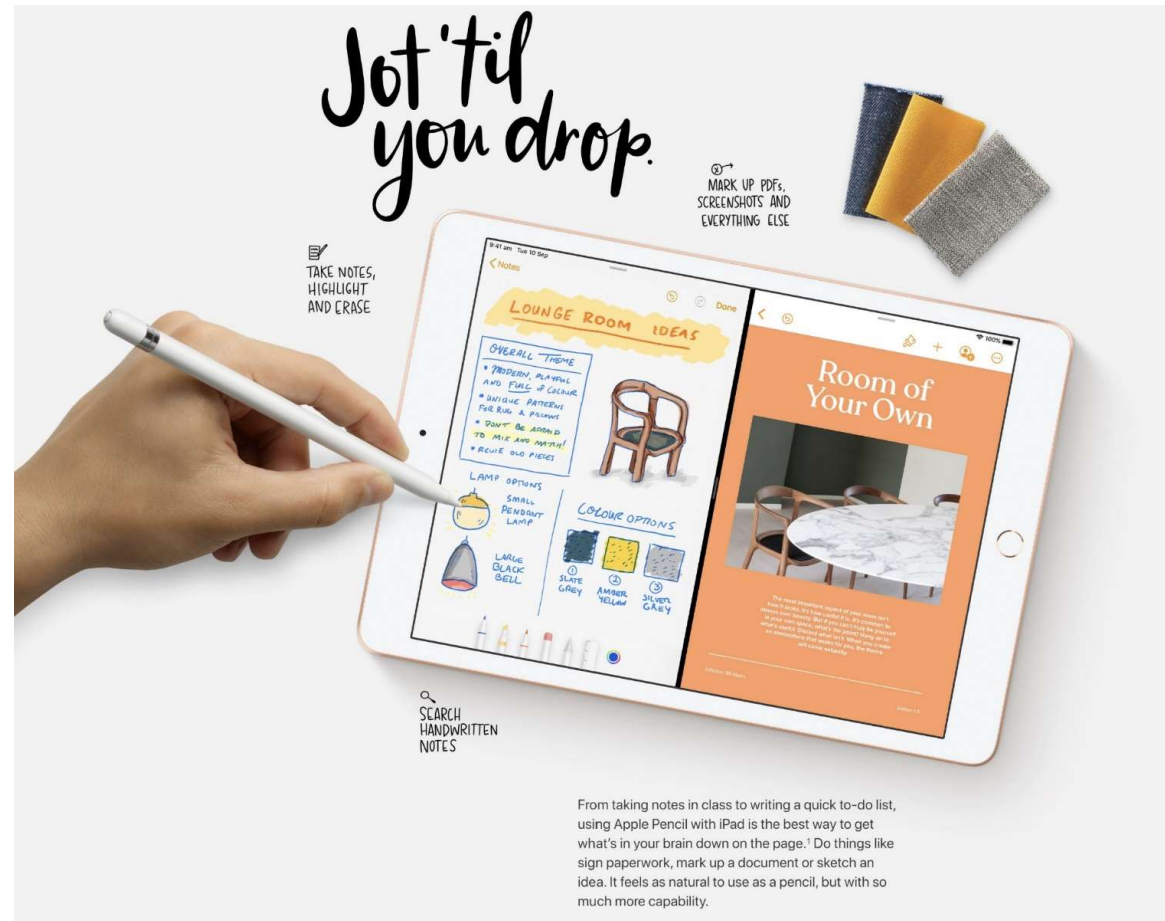

A range of peripherals are available for use with iPads:

- Keyboards
- Headphones
- Pencil
- Smart Keyboard
- Neoprene sleeve
- Case/Cover
- Tempered glass screen protector?

Peripherals are welcomed and encouraged, however the only compulsory extra is a case/cover.

Pencil

- The Apple Pencil is compatible with the latest 10.2" iPad.

From taking notes in class to writing a quick to-do list, using Apple Pencil with iPad is the best way to get what's in your brain down on the page. Do things like sign paperwork, mark up a document or sketch an idea. It feels as natural to use as a pencil, but with so much more capability.

Keyboard

- The Apple Smart Keyboard is compatible with the latest 10.2" iPad.

App Management

- AirWatch will no longer be used for Mobile Device Management for new BYO Devices
- It will be the responsibility of parents and students to ensure that required apps are installed on each device.
- Most apps are free or available at very low cost.
- A list of essential apps will sent home at the beginning of each semester
- Family Sharing assists with multiple devices

Insurance

- Try your home and contents insurance.
- Number of options can be found with a simple Google search
 - specifically for iPads at school
- AppleCare+

Additional Insurance

- AppleCare+ \$99

Enjoy up to two years of peace of mind when you buy AppleCare+ for iPad.

AppleCare+ for iPad provides up to two years of expert technical support and additional hardware coverage for iPad and Apple Pencil from Apple, including up to two incidents of accidental damage, each subject to a service fee of A\$65 for iPad and A\$45 for Apple Pencil.¹ In addition, you'll get 24/7 priority access to Apple experts via chat or phone through getsupport.apple.com.² Coverage begins on your AppleCare+ purchase date.

AppleCare+ benefits are in addition to any legal rights provided by Australian consumer law. For details, click [here](#).

Up to two years of Apple-certified service and support coverage

24/7 priority access to technical support through getsupport.apple.com

Coverage for up to two incidents of accidental damage¹

Battery service coverage¹

Which iPads are compatible?

Original iPad/iPad2/1st Gen iPad Air/1st Gen iPad Mini not compatible.

What size should you get?

A 32GB iPad may quickly become full, particularly if a student captures a lot of video, installs large quantities of personal music and applications. This may interfere with the storage requirements for school use. These personal items may need to be backed up regularly or removed if space has run out. A 128 GB iPad will future proof the device.

The current minimum storage offered on the iPad 6th Gen is 32 GB.

School Apps

- Apple suite of apps
 - Pages
 - Numbers
 - Keynote
 - iMovie
 - Free if iPad was purchased after 1 September 2013
 - Garage Band
 - Free if iPad was purchased after 1 Sept 2014
- The Google Education suite is used in conjunction with iPads and will be developed and supported by the school with Chromebooks for when dedicated computing skills are required.
- Many web based programs, such as Maths Online are already covered by the school.
- Some web-based content requires Flash, which is not compatible with iPad, however many web developers are seeking an alternative to Flash as it will soon be gone.

FAQ

Will BYOD with iPads cause a digital divide?

- Emerging evidence shows that the introduction of mobile devices in the educational context is bridging this divide.
- In addition, access to fast broadband and devices in an educational setting helps to mitigate any lack of a similar resource at home.

FAQ

To what extent will learning programs be driven by App cost?

- App purchases will not be driven by cost or availability but rather through the application of educational criteria.
- It is not about finding an effective app. It is about using Apps effectively.
- The best app is often the one you are most familiar with.
- The iPad is a tool for students and teachers.

FAQ

Will students be provided with 'free time' on devices?

- iPads, like any other technology, will only be used under teacher supervision.
- Any time spent on iPads should be directly linked to classroom curriculum. Students will not be permitted to access personal material at school.

FAQ

Will the school set out guidelines for what is meant by appropriate apps/material?

- iPads, like any other technology, will only be used under teacher supervision.
- ICT Acceptable Use Agreements
- Term 1 Library focus on cyber safety and digital citizenship each year.
- Coaching and parent/students workshops will be available.

FAQ

How will the BYOD program support students with learning difficulties?

- The 1:1 program will enable greater opportunities for differentiation. Adjustments to learning can be made more easily.
- Students will be able to show understandings in more flexible ways.

FAQ

What proportion of student work will be performed using the iPad?

- This will vary from day to day. Students will continue to use multiple resources for learning.
- We are not getting rid of paper , but we are making it smarter.
